DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I (claims 1-8) – an inductance structure having a conductive track and discontinuous conductive sections which individually parallel to a closest portion of the widening and electrically connected to ground and to the resistive layer.

Species II (claims 9-23) – an apparatus having an inductor including first and second conductive tracks, each second conductive track having a width narrower than the first conductive track.

Species III (claim 24) – an apparatus having an inductor including first and second conductive tracks, each second conductive track is parallel to at least two rectilinear sections of the first conductive track and equidistant between them.

Species IV (claim 25) – an apparatus having an inductor including first and second conductive tracks, some second conductive tracks are arranged to bisect angles formed by the first conductive tracks.

Species V (claim 26) – an apparatus having an inductor including first and second conductive tracks, some second conductive tracks are arranged to form a cross shape with another second conductive track.

Art Unit: 2814

Species VI (claim 27) – an apparatus having an inductor including first and second conductive tracks, some second conductive tracks are arranged to form an arrowhead shape with another second conductive track.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 2814

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phat X. Cao whose telephone number is (703) 308-4917. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (703) 308-4918. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
